MEDP Markets Available Buildings/Sites for Free

Macoupin Economic Development Partnership has been actively building a database of available commercial buildings and sites throughout Macoupin County free of charge. Using the LocationOne Information System (LOIS), Macoupin sites have been included in one of the oldest and largest economic development property database in the United States.

“The more available properties we can catalog, the more options we give area site selectors, developers and business owners a chance to find a location that best suits their business needs,” said MEDP Executive Director Shari Albrecht.

Macoupin County’s commercial buildings and sites can be found by visiting www.macoupinpartners.com and clicking on ‘Location One Building/Sites’ on the homepage. Once there, property searches can be conducted by size, building type, address, rail served or filtered by community. LocationOne recently redesigned their features to now include customized reports, thematic maps and mapping layers. Layers allow prospects to search a locality in proximity to air, rail, schools, hospitals and industries.

A listing on LocationOne, Macoupin buildings/sites will also be recorded on the Illinois Department of Commerce and Economic Development Opportunity and Sites Across America databases.

Locations can be priced for sale or lease. Commercial property owners and real estate agents are encouraged to assist MEDP in this process. If you have a location you would like to register for free. Please contact Courtney Wood at courtney@macoupinpartners.com or 618-409-6044.
